Experience the Fine Art of Flying

## THE AIRCRAFT

The Learjet 45's cabin holds eight seats, usually in a double club layout, with plenty of room to recline. The interior of the Learjet 45 is designed to offer the most usable passenger space possible. Its speed and economy are to be expected, it is a Learjet after all! The integrated features of this Jet come together to deliver an exceptional aircraft.

## THE INTERIOR

The Learjet 45 is powered by two DEEC-controlled Honeywell TFE731-20AR engines, a 20 FADEC-equipped version developed specifically for this airframe, each providing 3,500 lbs of thrust. With this powerful performance, the cabin remains quiet with noise levels never exceeding 72 dB. A two-zone temperature control system ensures that both the cabin and cockpit are kept comfortable. Additionally, the aircraft offers ample storage, with 50 cubic feet of external baggage space and an additional 15 cubic feet of interior storage.

## CHECKLIST

Seats:	Up to 8
Speed	436 Knots
Range	1425nm
Luggage Space	50 cubic ft
Cabin Height	4ft 9in
Cabin Width	5ft 1in
Cabin Length	19ft 9in
Flight Attendant	No
